

Pediatric Urology Services

UC Irvine Health Department of Urology is home to Orange County's only fellowship-trained, multidisciplinary team specializing in pediatric urology.

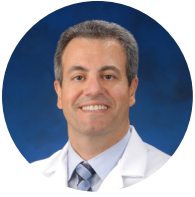

Our nationally recognized surgeons have extensive training in treating the most complex pediatric urologic cases. We deliver exceptional care and offer state-of-the-art treatments for kidney, bladder, urinary and genital disorders — all in a supportive, family-centered environment in partnership with CHOC Children's.

We proudly and conveniently provide a wide variety of urological services for children.

In addition to expert consultations, we offer:

- Newborn circumcisions
- Biofeedback
- Flow rate with EMG
- Post void residual bladder scans
- Ultrasound with color doppler
- Urodynamics
- Videourodynamics
- Surgical procedures
- In-office procedures (circumcisions, lysis of skin bridges, labial and preputial adhesions and meatotomies).
